THE STORY OF HERSTAL

Since 1988, Herstal has been sheding light in many homes across Northern Europe. From the origins of Danish Design Herstal inspires people to illuminate their surroundings in new ways by offering a playful yet timeless design. Reflecting on the heritage in a future orientation, Herstal introduces a new journey. It has always been about creating an atmosphere through joyful design and comfortable light aspects. 30 years of experience in developing lighting is one of the key elements in being able to present the new vibrant collections.

“I believe the reason why people keep coming back to buy our designs is a combination of the playful and living expression that characterizes the most of our lamps. But if it had not been for the well thought and carefully developed light aspects of each lamp, the story would never have been the same.”

- Martin Herstal, founder

To mark the new journey, the brand is revitalized in a new expression. The new logo reflects modern urbanism with small details to be distinctive and recognizable. Our vision is to create fresh and vibrant designs and inspire the young people seeking an urban lifestyle at a fair price level.

Throughout this year several new collections are introduced. The releases will reveal new interesting collaborations with designers. Relief, Atom and Neo, are the first three collections which are now released. Stay tuned for more vibrant design releases from the new Herstal.
