

Imagine the morning sun. Stay with this image for a moment.
Just to sense how it marks the start of a new day.
How it makes us feel good.
How it makes us see our opportunities in a fresh perspective.

This shows the importance of light to our lives and wellbeing.
That's why we recognise and appreciate lighting products
as a vital influencer on people's wellbeing.
That's why we're passionate about inspiring people
to make the most of lighting.

Simply put, we strive to contribute to change people's
lives into something better through our lighting products.
We do so by delivering a wide range of products with
a superior combination of lasting quality, great design,
with unique functionality which are easy
to use - at competitive prices.

We're committed to greatness.
We're ambitious and always moving forward
to seize new opportunities. We improve everything we do.
We hold a competitive mindset and strive
to deliver results that we can all be proud to be a part of.

We're embracing tomorrow.
We stay agile and open minded, creating growth
through people with different ideas, strengths and interests.
We're constantly focusing on delivering
new inspiration to consumers and retailers.

We're putting people first. We put human behaviour and
needs first when we develop products.
We create an environment with diversity and trust,
where we can think big, have fun and do good.
We're authentic and present to each other and
those we do business with.

We want to grow our business in a way that makes us all proud.
Proud of the positive impact on people's lives.
Proud of how we get there. Together.

Let's go and improve the quality of lives through lighting.
Just like when the sun rises every morning.

CEO Nordlux

Light of my life

The 2019 Nordlux collection embraces great lighting trends for both decorative, functional, outdoor and bulbs.

Light is an essential part of people's life. Therefore, our aim is to lift people's quality of life with light through flexible lighting adjustable to all situations, highly considered materials and beautiful designs which are easy to fall in love with. This is really the core of this year's collection.

The Nordlux decorative 19/20 collection is all about details. This year, we present our largest decorative assortment ever. Here, every single detail is embraced, which contributes to new and improved lighting experiences.

For us, lighting should be both fun and affordable to everyone. Therefore, this year's decorative collection is characterized by trendy designs at attractive and solid prices.

Lighting should not only be decorative - the functional aspect is just as important. Therefore, we are dedicated to developing our functional range by constantly improving the functionality of light.

This is done through our professional research and development team, consisting of engineers with major experience within the lighting industry. This year, our sustained development has resulted in the largest assortments of functional lighting, including decorative ceiling lights that can be adapted to individual needs, as well as a complete bulb assortment.

In the new collection, you will also find an outdoor collection that emphasizes the careful selection of waterproof and resistant materials for our outdoor product. This year, we can proudly present new materials which are suitable for seaside environments including high-quality galvanized steel, where Nordlux have a leading position.

Furthermore, the collection also reflects how the considered design and materials have led to outdoor products being suitable for both indoor and outdoor use, which we also have received prestigious design awards for.

We proudly present our 19/20 collection

NEW 19/20

Lilly is a highly decorative series that combines simplicity and elegance in the finest possible manner. There is an obvious ease to the interplay of the minimalist frame and the elegant, luminous glass domes where the opal white glass lets a warm and pleasant light penetrate it.

Nordlux decorative

We know that good lighting is one of the most essential elements for creating warmth and atmosphere in the home, but also for the general wellbeing of people. Therefore, this year's decorative collection reflects that lighting should be a fun and exciting part of the decor - of course at competitive and attractive prices.

This year, we proudly present our largest decorative assortment ever, where function, materials, soft shapes and new features are in focus and therefore a lamp is not just a lamp in this collection. You will see extensions of some of the most popular series getting new family members and evolvement of well-known designs in new colors and materials. Therefore, the new collection consists of both contemporary designs and interesting trends, which makes it possible to choose lighting based on your personal taste and style preferences.

We proudly present our 19/20 collection

Adrian series

NEW 19/20

With its raw and industrial design, the Adrian series creates a contrast to the bright and feminine Nordic interior style. The interaction between the rough surface and the integrated screws reinforces the industrial expression. In contrast to the rough design, the screen creates cosy lighting with downward light and simultaneously spreads the light out into the room through the screws on the side, contributing to a whole new lighting experience.

Get more information about the Adrian series on p. 42

Alexander series

NEW 19/20

Alexander is a modern lamp in a timeless design. The shiny metal details combined with the silky matte surface make the lamp highly decorative and along with the round metal screen, which provides a great downward light, design and functionality are balanced in the most wonderful of ways.

Get more information about the Alexander series on p. 44

Alton series

NEW 19/20

In smoked glass, Alton creates a beautiful coherence between the black top, and the sweeping round shape, which makes the series extremely elegant. The smoke-coloured glass and the delicate shapes add a soft and warm glow to the light, resulting in pleasant lighting.

Glass is a major trend in decor, and the combination of glass and the matte black metal gives Alton an elegant appearance.

Andy series

NEW 19/20

The Andy series has been inspired by old vintage lamps and has an antique air about it. The rust-coloured and rough surface adds edge and personality and is a great contrast to a bright, Nordic decor.

Get more information about the Andy series on p. 50

Christina series

NEW 19/20

Christina contributes to the popular interior trend of using glass as part of decor. The smoked glass dome gives the lamp a special feel when using decorative light sources which spread a warm and soft light in the room. At the same time, the robust base creates a contrast to the soft glass, which fits well into minimalist decor.

Get more information about the Christina series on p. 72

Ella series

NEW 19/20

Ella is a timeless and classic series. The minimalist design and beautiful matte metal contribute to a quiet and elegant expression. The matte screen provides a warm, downward light, which combines attractive design and functionality in the most gorgeous of ways.

Get more information about the Ella series on p. 52

Ellen series

NEW 19/20

The essence of Scandinavian design is reflected in the timeless Ellen series. The simple and round design in this series has been achieved in the most beautiful of ways, where the design of the lamp provides a complete expression. The large, domed screen contrasts nicely with the lightweight frame and, at the same time, contributes visual volume and a wide field of light, giving pleasant lighting.

Get more information about the Ellen series on p. 54

Emma series

NEW 19/20

Emma is a modern series in which the design creates an innovative lighting effect. Through the beautiful surface of the opal glass at the top of the lamp, the light flows softly and warmly out into the room.

Get more information about the Emma series on p. 62

Josefine series

NEW 19/20

The innovative and playful design makes Josefine a decorative and modern series. The stringent tube contributes to an industrial expression with associations to rough and modern decoration. In contrast to the industrial expression are the beautiful brass details and soft shapes, which result in an incredibly decorative series that balances minimalism and elegance in the finest possible manner. Furthermore, the Josefine series allows for personality in the use of decorative lights, illuminating the room in the finest manner imaginable.

Get more information about the Josefine series on p. 56

Julian series

NEW 19/20

Julian is a minimalist series in a modern design. With the combination of the matte surface and the elegant top in brushed brass, the series takes on an air of exclusivity. The warm light spreads both upwards and downwards through the small holes in the top of the screen, creating a beautiful effect in the light as it spreads out into the room, giving Julian its unique character.

Get more information about the Julian series on p. 58

Lilly series

NEW 19/20

Lilly is a highly decorative series that combines simplicity and elegance in the finest possible manner. There is an obvious ease to the interplay of the minimalist frame and the elegant, luminous glass domes where the opal white glass lets a warm and pleasant light penetrate it.

Get more information about the Lilly series on p. 60

Milford series

NEW 19/20

Milford is a decorative series, where the opal white glass gives a very particular expression to the series. The combination of the organic forms and the grooved, transparent surface creates elegance and illuminates the room with a soft and warm light.

Get more information about the Milford series on p. 63

Pop series

NEW 19/20

The timeless Pop series exudes simplicity and modern design. The simple design is expressed through the tight frame and round screen, where a nice contrast is created to the rough surface and brushed brass detail which also gives Pop an industrial expression.

Get more information about the Pop series on p. 86

William series

NEW 19/20

William is traditional in both form and shape. The classic round shapes are broken by pure geometric lines in the screen, which give the lamp a particular expression, where minimalism and modern design combine in the finest manner imaginable.

Get more information about the William series on p. 66

NEW 19/20

TIAKI is a round downlight with integrated LED, allowing for parallel connection. TIAKI has MoodMaker functionality, which makes it possible to dim the light in two steps without the use of a dimmer, simply using a standard electrical outlet, while the downlight automatically remembers the last light setting as well. TIAKI allows you to switch between 600lm at 4000K and 345 lm at 2700K. The downlight even meets protection class IP65, which makes it usable in humid environments.

Functional

The 19/20 functional collection reflects how the constant development of technology creates new opportunities for offering products, that makes everyday life easier and better with lighting. At Nordlux we aim to lift people's quality of life with light and therefore this year's functional collection is based on flexibility and functionality.

This year's collection emphasizes our dedication to creating functional products with the right balance between high quality and low prices. Our functional products have a long lifetime and contains some of the leading LED technology, however, we also focus on creating lamps that are able to do more than just light up the room. This is possible because of the combination of our own production, own research and development team consisting of professional engineers and collaboration with different world-class suppliers. Therefore, this year's collection embraces that functional lighting should be a beautiful as well as functional part of the interior design.

We proudly present our 19/20 collection

Carina series

NEW 19/20

Carina is a retrofit downlight for indoor use with a die-cast frame. Carina is quick and easy to assemble via a screwless connector and twist-lock system. Furthermore, the downlight includes a dimmable GU10 354lm bulb, which makes it possible to dim the lights depending on the situation and needs.

Get more information about the Carina series on p. 186

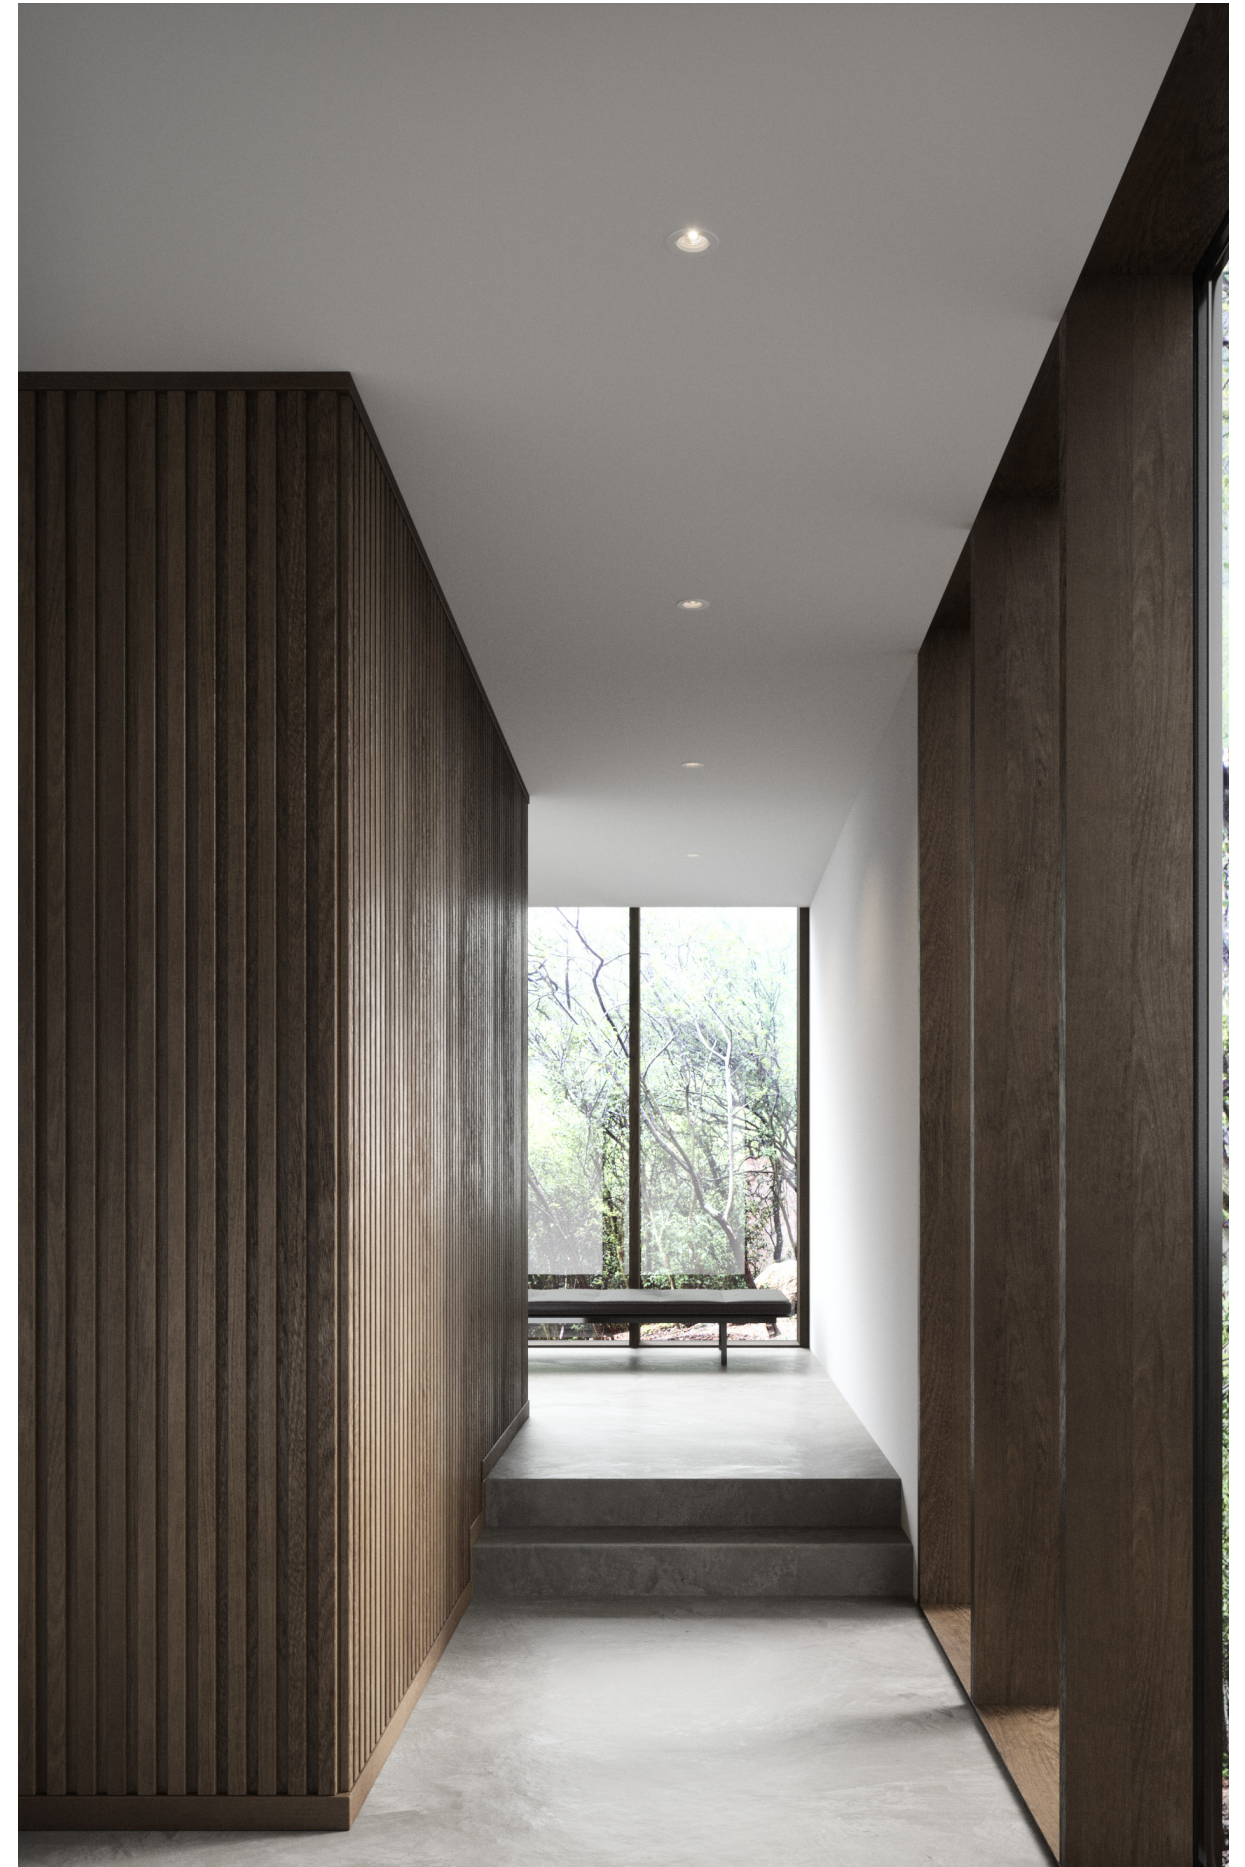

Dorado series

NEW 19/20

A classic round downlight with an integrated LED 345lm dimmable LED module. Dorado is quick and easy to mount via a screwless plug-in connection and a twist-lock system, and at the same time multiple downlights can be easily connected to each other.

Get more information about the Dorado series on p. 188

Tiaki series

NEW 19/20

TIAKI is a round downlight with integrated LED, allowing for parallel connection. TIAKI has MoodMaker functionality, which makes it possible to dim the light in two steps without the use of a dimmer, simply using a standard electrical outlet, while the downlight automatically remembers the last light setting as well. TIAKI allows you to switch between 600lm at 4000K and 345 lm at 2700K. The downlight even meets protection class IP65, which makes it usable in humid environments.

Get more information about the Tiaki series on p. 173

Oja series

NEW 19/20

OJA is an universally applicable ultra-flat ceiling light with integrated LED and panel technology, which have a very long lifetime of 25.000 hours.

Oja comes in two different versions. A non-dimmable version and a version with Moodmaker™ functionality, that allows you to dim the product in 3 steps without a dimmer, only with a regular wall switch. Oja comes in a comfortable warm-white light of 2.700K and a cold white light of 4.000K.

Get more information about the Oja series on p. 214

Oakland series

Universally applicable LED batten in IP65 with integrated LEDs in a slim design with high lumen output and quick wiring terminal block as an energy efficient replacement of traditional IP65 fixtures. This product with an extra long lifetime of 25.000 hours has the option for loop-in/loop-out wiring.

Get more information about the Oakland series on p. 250

Westport series

NEW 19/20

Westport is a plastic light fixture with an integrated LED light source, which contributes to a long life time on 25,000 hours. The light fixture provides a good functional light of 4000 K and has a high degree of protection, which makes Westport suitable in, for example, the garage or basement.

Get more information about the Westport series on p. 242

Latona series

NEW 19/20

Latona is a thin fixture with integrated LED, that is ideal to use under cabinets. The Moodmaker™ function allows you to change the color temperature between warm and cold light simply by clicking on the switch on the panel. This way you can change the light according to the moments in life: warm light for a warm atmosphere or white cold light for eg. cooking or cleaning. Latona can be parallel connected, which allows you to put several of Latona on a row.

Get more information about the Latona series on p. 246

Renton series

NEW 19/20

Universally applicable under cabinet LED batten
in IP20 with integrated LEDs as a replacement
of T5 fluorescent fixtures.

Get more information about the Renton series on p. 246

IP series

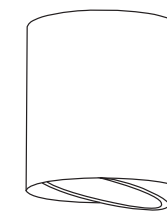

IP means International Protection and is used in connection with the material's protection class. IP is stated with 2 numbers (e.g. IP20) to say how safe the material is in connection with water penetration and the penetration of dust and solid objects. Materials are divided into protection classes that state – partly the protection of the material itself against penetration of foreign objects and water – and partly the protection of people who touch dangerous parts. The first number always states the degree of protection against foreign objects penetrating the material, but at the same time it states a certain smallest degree of protection of people who touch dangerous parts. The second number states the degree of protection from water penetrating the material.

Fallon 1-Kit

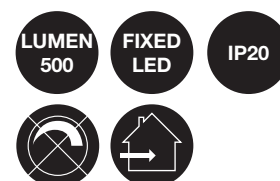

Built on

No. 47540101 White
No. 47540103 Black
No. 47540132 White/brushed steel

Master Box qty 3
Material: Metal/Plastic
IP20, Class 2
Fixed LED, Incl. 8,5W LED, Incl. 4-Step MOODMAKER,
Parallel connection possible, 5 year LED guarantee,
Light source: Lumen 500, Kelvin 2.700,
Life hours 20.000, RA 80, Beam angle 110°, Not dimmable
Fixture energy class A++ - A

4-STEP DIMMER MOODMAKER™

Measurements
D: 6 cm
Ø: 10 cm

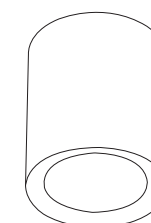

Fallon Long 1-Kit

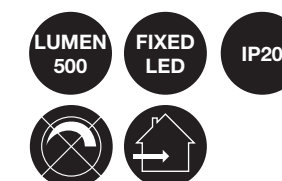

Built on

No. 47550101 White
No. 47550103 Black
No. 47550132 White/brushed steel

Ø: 10 cm

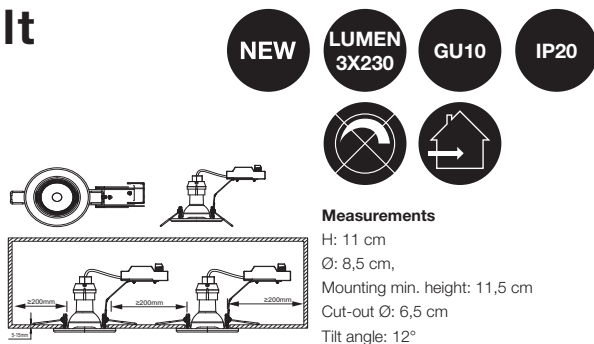

Canis 2700K 3-Kit Tilt

Built in

No. 49300101 White
No. 49300155 Nickel

Master Box qty 3
Material: Metal
IP20, Class 2
GU10, Max. 50W, Incl. 3x3,7W LED,
Light source: Lumen 3x230, Kelvin 2.700,
Life hours 15.000, RA 80, Beam angle 36°, Not dimmable
Light source energy class A+
Fixture energy class A++ - A

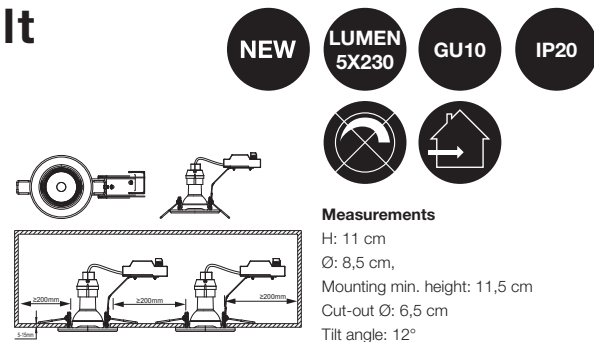

Canis 2700K 5-Kit Tilt

Built in

No. 49310101 White
No. 49310155 Nickel

Master Box qty 3
Material: Metal
IP20, Class 2
GU10, Max. 50W, Incl. 5x3,7W LED,
Light source: Lumen 5x230, Kelvin 2.700,
Life hours 15.000, RA 80, Beam angle 36°, Not dimmable
Light source energy class A+
Fixture energy class A++ - A

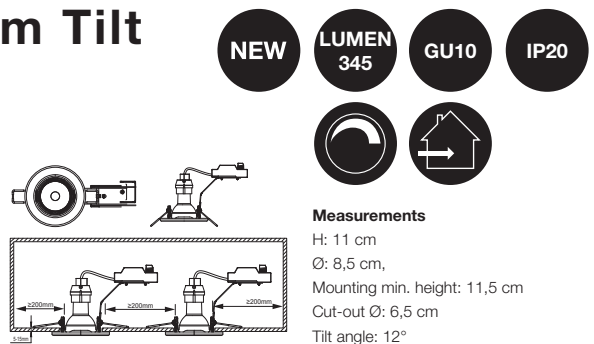

Canis 2700K 1-Kit Dim Tilt

Built in

No. 49320101 White
No. 49320155 Nickel

Master Box qty 3
Material: Metal
IP20, Class 2
GU10, Max. 50W, Incl. 4,9W LED,
Light source: Lumen 345, Kelvin 2.700,
Life hours 15.000, RA 80, Beam angle 36°, Dimmable
Light source energy class A+
Fixture energy class A++ - A

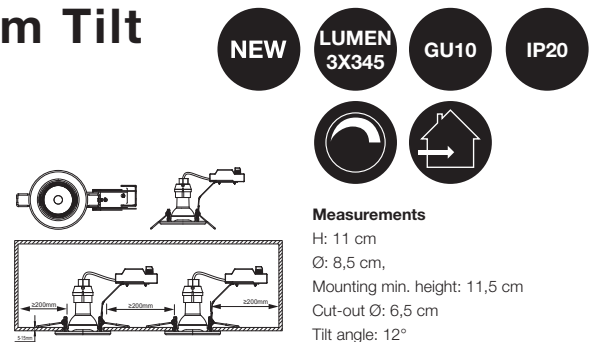

Canis 2700K 3-Kit Dim Tilt

Built in

No. 49330101 White
No. 49330155 Nickel

Master Box qty 3
Material: Metal
IP20, Class 2
GU10, Max. 50W, Incl. 3x4,9W LED,
Light source: Lumen 3x345, Kelvin 2.700,
Life hours 15.000, RA 80, Beam angle 36°, Dimmable
Light source energy class A+
Fixture energy class A++ - A

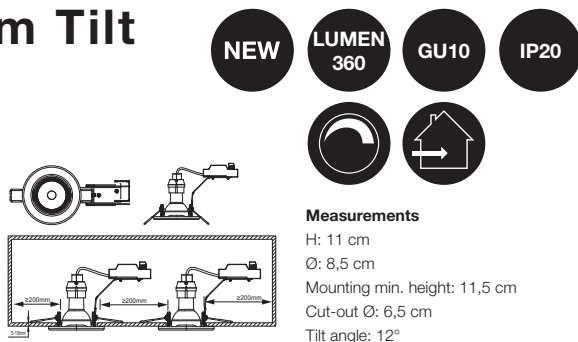

Canis 4000K 1-Kit Dim Tilt

Built in

No. 49360101 White
No. 49360155 Nickel

Master Box qty 3
Material: Metal
IP20, Class 2
GU10, Max. 50W, Incl. 4,9W LED,
Light source: Lumen 360, Kelvin 4.000,
Life hours 15.000, RA 80, Beam angle 36°, Dimmable
Light source energy class A+
Fixture energy class A++ - A

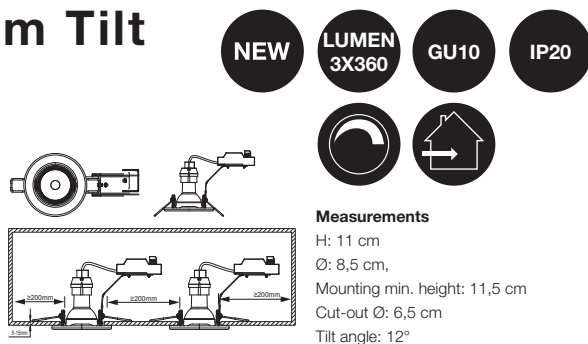

Canis 4000K 3-Kit Dim Tilt

Built in

No. 49370101 White
No. 49370155 Nickel

Master Box qty 3
Material: Metal
IP20, Class 2
GU10, Max. 50W, Incl. 3x4,9W LED,
Light source: Lumen 3x360, Kelvin 4.000,
Life hours 15.000, RA 80, Beam angle 36°, Dimmable
Light source energy class A+
Fixture energy class A++ - A

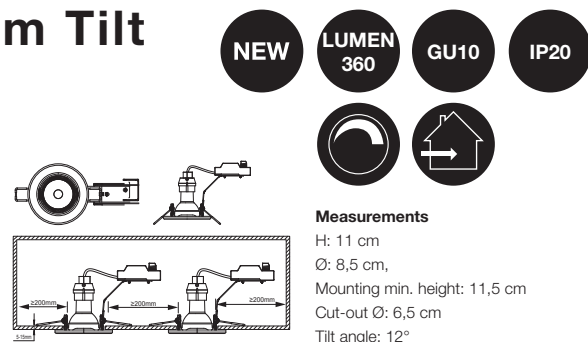

Canis 6500K 1-Kit Dim Tilt

Built in

No. 49380101 White
No. 49380155 Nickel

Master Box qty 3
Material: Metal
IP20, Class 2
GU10, Max. 50W, Incl. 4,9W LED,
Light source: Lumen 360, Kelvin 6.500,
Life hours 15.000, RA 80, Beam angle 36°, Dimmable
Light source energy class A+
Fixture energy class A++ - A

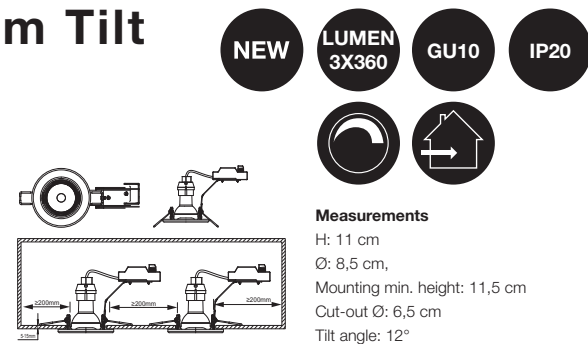

Canis 6500K 3-Kit Dim Tilt

Built in

No. 49390101 White
No. 49390155 Nickel

Master Box qty 3
Material: Metal
IP20, Class 2
GU10, Max. 50W, Incl. 3x4,9W LED,
Light source: Lumen 3x360, Kelvin 6.500,
Life hours 15.000, RA 80, Beam angle 36°, Dimmable
Light source energy class A+
Fixture energy class A++ - A

Birla 1-Kit

Built in

No. 84950001 White - White cable

Master Box qty 6

Material: Plastic

IP44, Class 2

Cable: 20 cm replaceable

Fixed LED, Incl. 6W LED,

Parallel connection possible

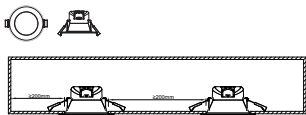

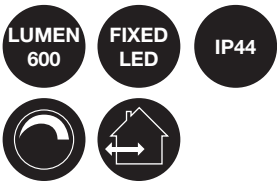

Can be mounted directly in the insulation

5 year LED guarantee,

Light source: Lumen 600, Kelvin 3.000

Life hours 30.000, RA 80, Beam angle 90°, Dimmable

Fixture energy class A++ - A

Measurements

H: 5,75 cm, Ø: 9,5 cm,
Mounting min. height: 6 cm
Cut-out Ø: 7 cm

Roar Dim Tilt 1-Kit

Built in

No. 84960001 White - White cable

Master Box qty 6

Material: Plastic

IP23, Class 2

Cable: 20 cm replaceable

Fixed LED, Incl. 6W LED,

Parallel connection possible

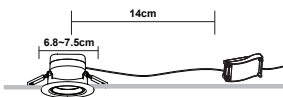

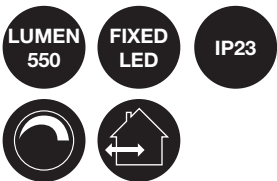

Can be mounted directly in the insulation

5 year LED guarantee,

Light source: Lumen 550, Kelvin 3.000

Life hours 30.000, RA 80, Beam angle 40°, Dimmable

Fixture energy class A++ - A

Measurements

H: 4,4 cm, Ø: 8,5 cm,
Mounting min. height: 7 cm
Cut-out Ø: 6,8 cm, Tilt angle:
30°

Recess 3-Kit LED COB

Built in

No. 84650001 White - Black cable

No. 84650032 Brushed steel - Black cable

Master Box qty 3

Material: Metal

IP23, Class 2

Cable: 200 cm replaceable

GU10, Max. 3X35W, Incl. 3X3W COB,

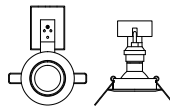

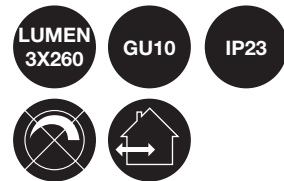

Parallel connection possible,

Light source: Lumen 3X260, Kelvin 3.000

Life hours 25.000, RA 80, Beam angle 38°, Not dimmable

NEW 19/20

This bulb is a frosted A60 bulb with 9.2W and 806lm. The bulb has a 2 Step-Dim where you can dim the light with your regular switch from 100%->30%. The beam angle is 240° and the color temperature is 2700K. The cap size is E27 and the RA values is under 80. The bulb is A+ rated and it has a lifetime of 15000 hours. The dimension of the bulb is 60x60x109mm. Eq. W=60W.

Bulbs

This 19/20 collection, our sustained development has resulted in the largest ever assortments of bulbs, and therefor we are pleased to present a complete bulb assortment.

The collection emphasizes our dedication to developing bulbs that have the right balance between high quality and low prices. Our bulbs have a long lifetime and contains world's leading LED technology, have an elegant design, good color rendering, from low to high wattages and lumen, high energy efficiency and long lifetime.

You will find our range of Moodmaker™ bulbs, the big expansion of the ranges in full glas, clear and milky bulbs, and also the basic plastic range and lastly our deco bulb assortment.

We proudly present our 19/20 collection

NEW 19/20

Polperro is inspired by harsh coastal areas with roaring seas and tall waves. The maritime design makes Polperro a decorative and classic wall lamp that fits beautifully by the front door, the garage or on the fence. Furthermore, the Polperro can be connected in parallel, making the lamp extremely functional.

Outdoor

The 19/20 outdoor collection reflects our dedication for continuous development of technology, showing new innovative lighting solutions including automatic sundown light and movement sensors beautifully integrated into the design. The technology also enables personalization, allowing you to design your own light using patterned inserts, and furthermore, you will find products with new and easier methods for installation.

At Nordlux we wish to lift people's quality of life with light and therefore we always strive to develop products in the best possible quality at a price that allows everyone to join in. Therefore, you will see well-known products which have been updated with improved design and quality at an even better price. Our passion for great design, has also led to that our outdoor products is so stylish that they are suitable for indoor use.

We proudly present our 19/20 collection

Canto 2 series

NEW 19/20

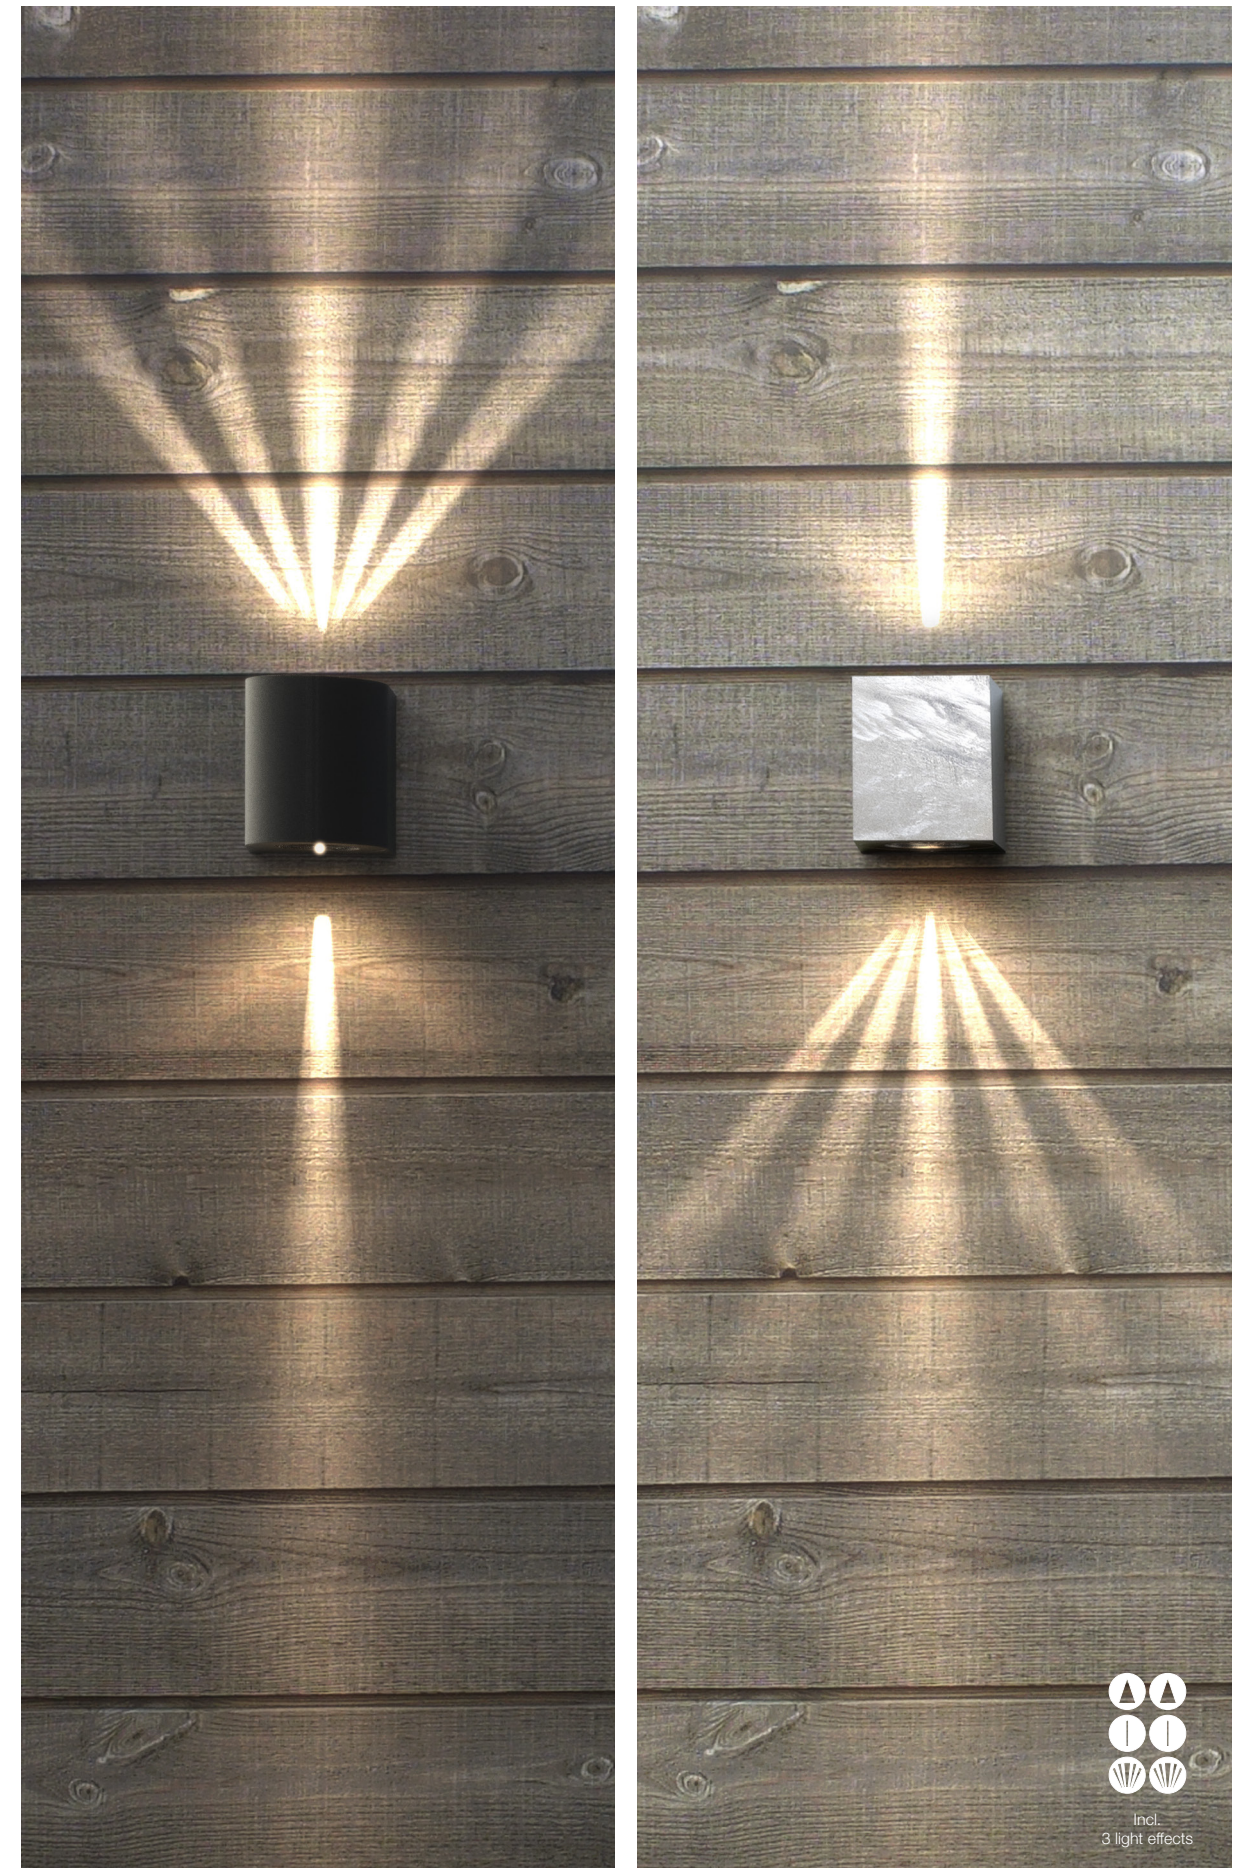

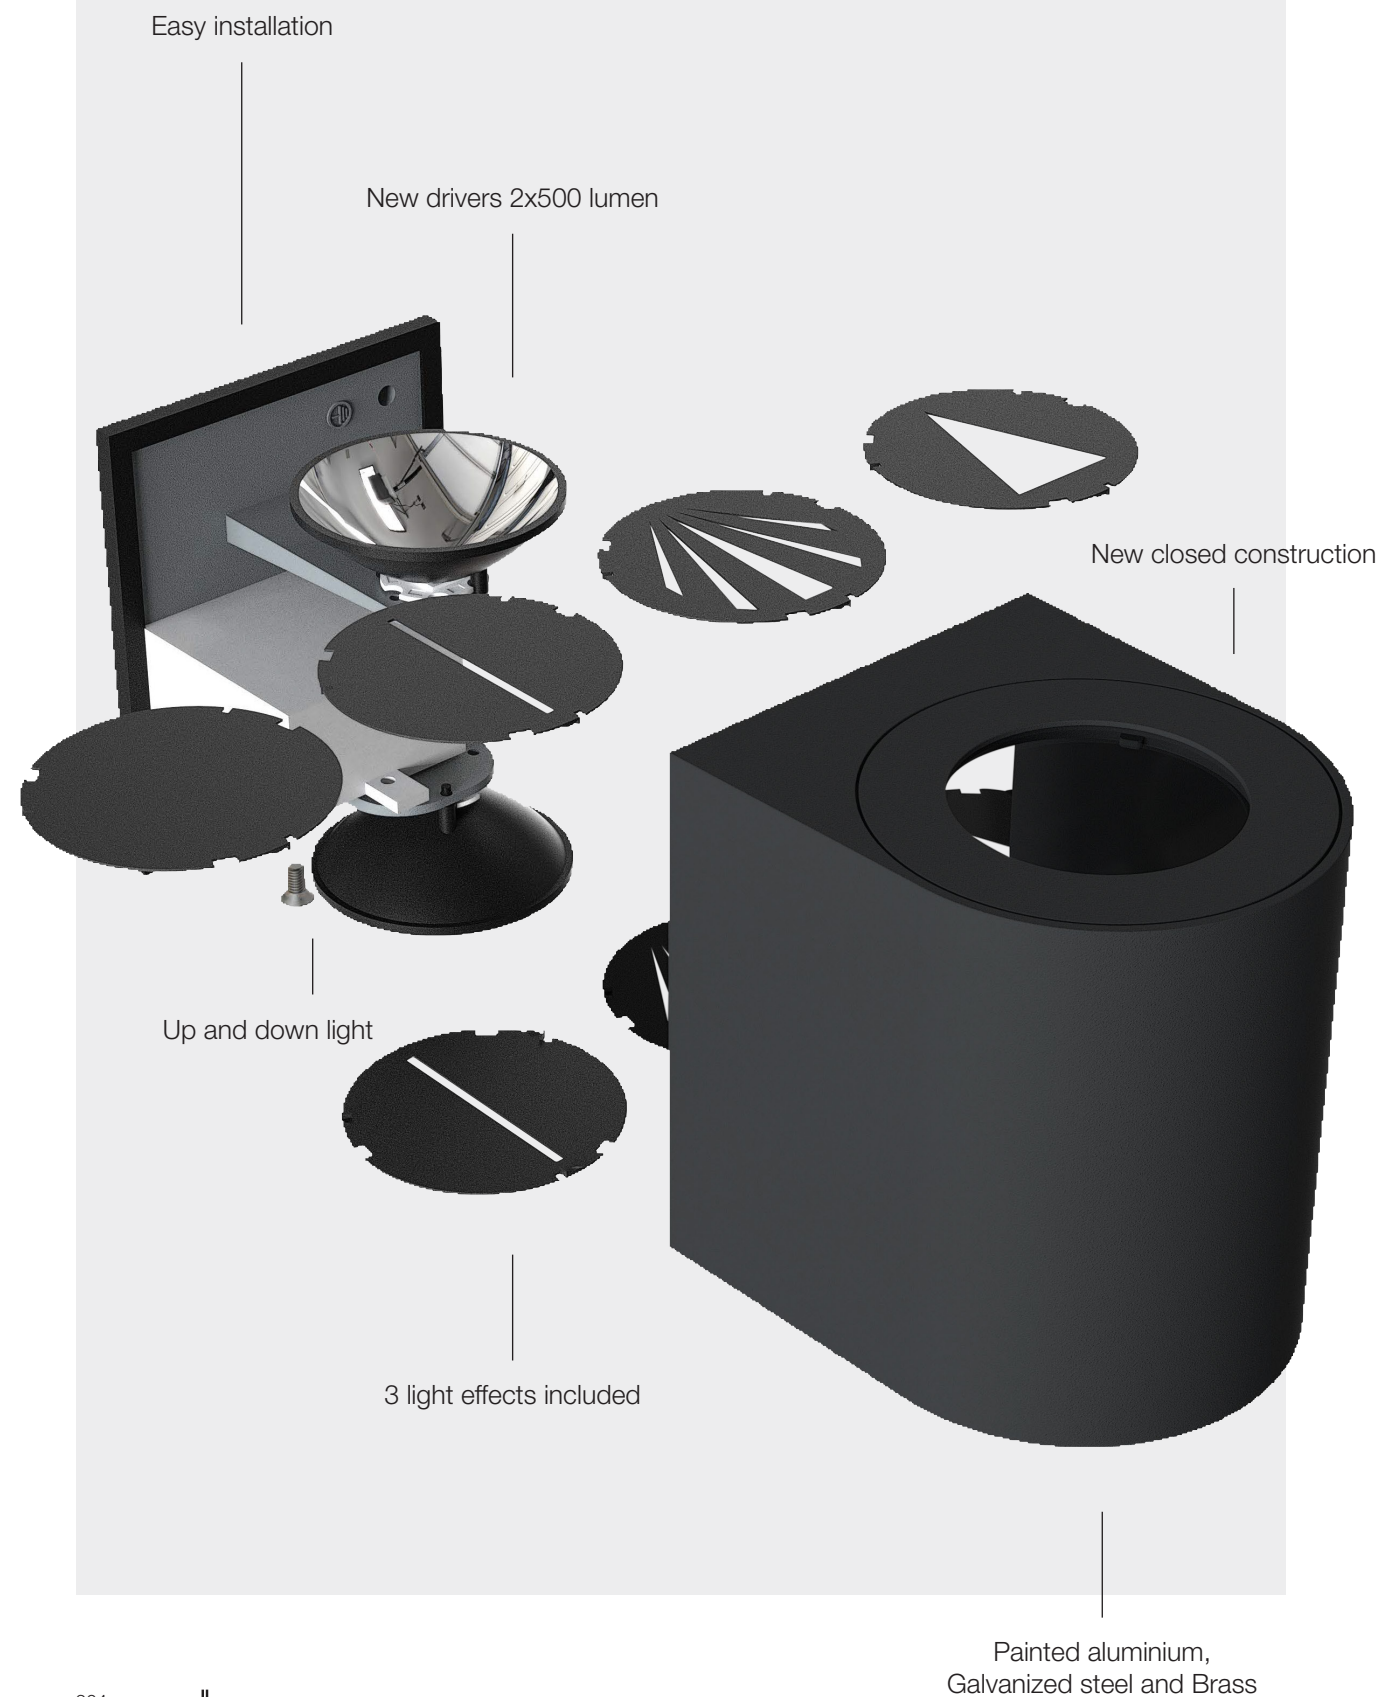

Canto is a true Nordlux product. Almost half a million Canto's are now lighting up people's lives. It offers a great combination of form and function - the combination of up and down light gives a unique and almost sculptural expression and the option to create your own light effects makes it personal. The timeless Danish design makes it an attractive addition to most homes and can be used both indoor and outdoor. 19/20 Canto gets a full upgrade with higher lumen output, easier installation and an even simpler design. And at the same time the price goes down.

Danish design by Bønnelycke mdd

Get more information about the Canto 2 series on p. 328

Canto 2 - an upgraded bestseller

Concordia garden

NEW 19/20

Concordia is a modern and minimalist garden lamp used to illuminate outdoor space in a beautiful way. With its geometrical design, the one-metre-tall lamp is a standing sculpture in the outdoor space, which can be advantageously placed along the driveway, pathway or used for general illumination of the garden.

Danish design by Bønnelycke mdd

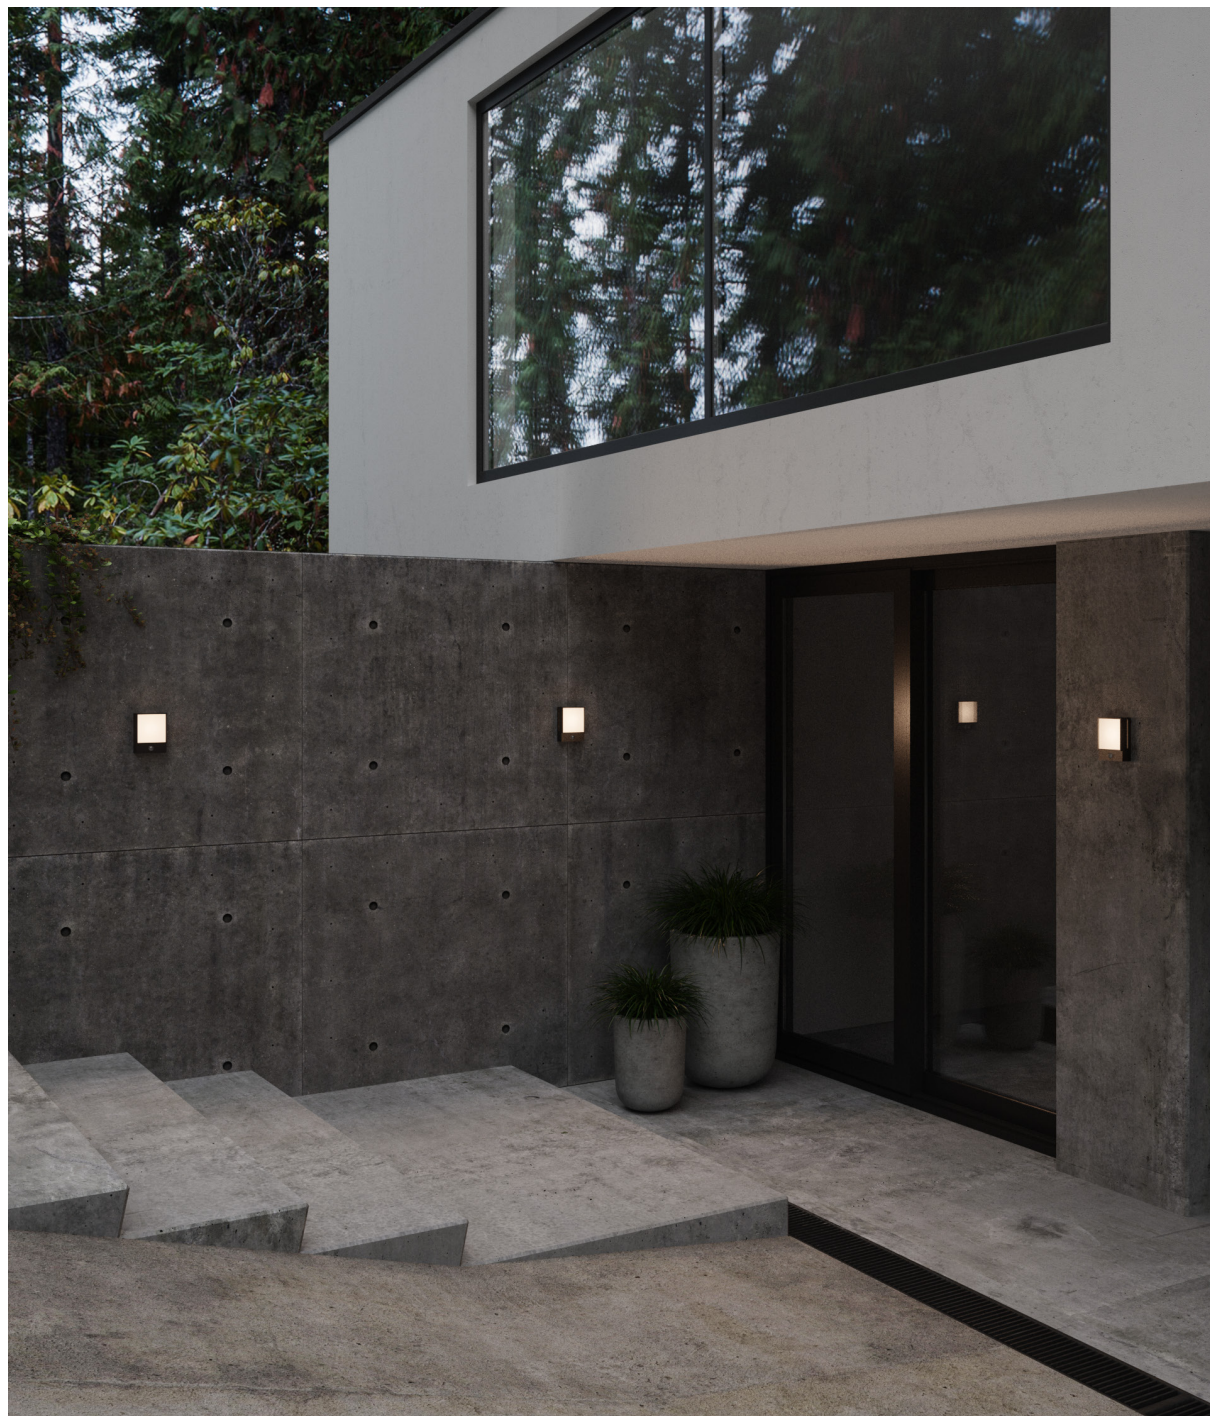

Get more information about Concordia on p. 349

Egon wall

NEW 19/20

Egon is a modern outdoor wall lamp with a beautiful rectangle shape. The lamp has an integrated LED, which contributes to low energy consumption and long life. Egon has two lighting functions. When darkness falls, the light automatically comes on with a soft twilight lighting, and at the same time the built-in sensor is triggered by movement, making Egon extremely practical and functional. Nordlux offers a 5-year LED warranty.

When darkness falls, the light automatically comes on with a soft twilight lighting

When movement is detected, the full light is triggered

Get more information about Egon on p. 348

Nestor wall

NEW 19/20

The gorgeous minimalist form makes Nestor a modern and timeless wall lamp. The lamp has an integrated LED, which has a long lifetime and a low energy consumption. Furthermore, the lamp can be connected in parallel to multiple lamps, making Nestor highly functional. Nordlux offers a 5-year LED warranty.

Get more information about Nestor on p. 346

Hunt series

References to both lunar and solar eclipses, or perhaps endless, starry nights, are obvious when light streams from Hunt. Designers Bjørn + Balle pair the square and the circle, playing with the interaction of light and shadow. From the meeting between the two geometric shapes, the light escapes and settles like a soft aura of the square plate. The dome is perforated, and allows dots of lights to be released – resulting in a bright, starry sky.

Danish design by Bjørn + Balle

Get more information about the Hunt series on p. 340

Maze series

With a decorative and embellished purpose in mind, the designer behind Maze, Bønnelycke MDD, took outdoor lighting to new heights. The geometric shapes create an artistic expression that gives the lamp an unusual and eye-catching dimension – like if you were caught in a maze.

Danish design by Bønnelycke mdd

Get more information about the Maze series on p. 338

Scorpius series

Scorpius Wall light for outdoor use has a classic and timeless design. Scorpius has many uses – the perfect fit at the front door, at the entrance, on the fence, or in the stairwell. It can be used alone or with several placed side by side.

Get more information about the Scorpius series on p. 370

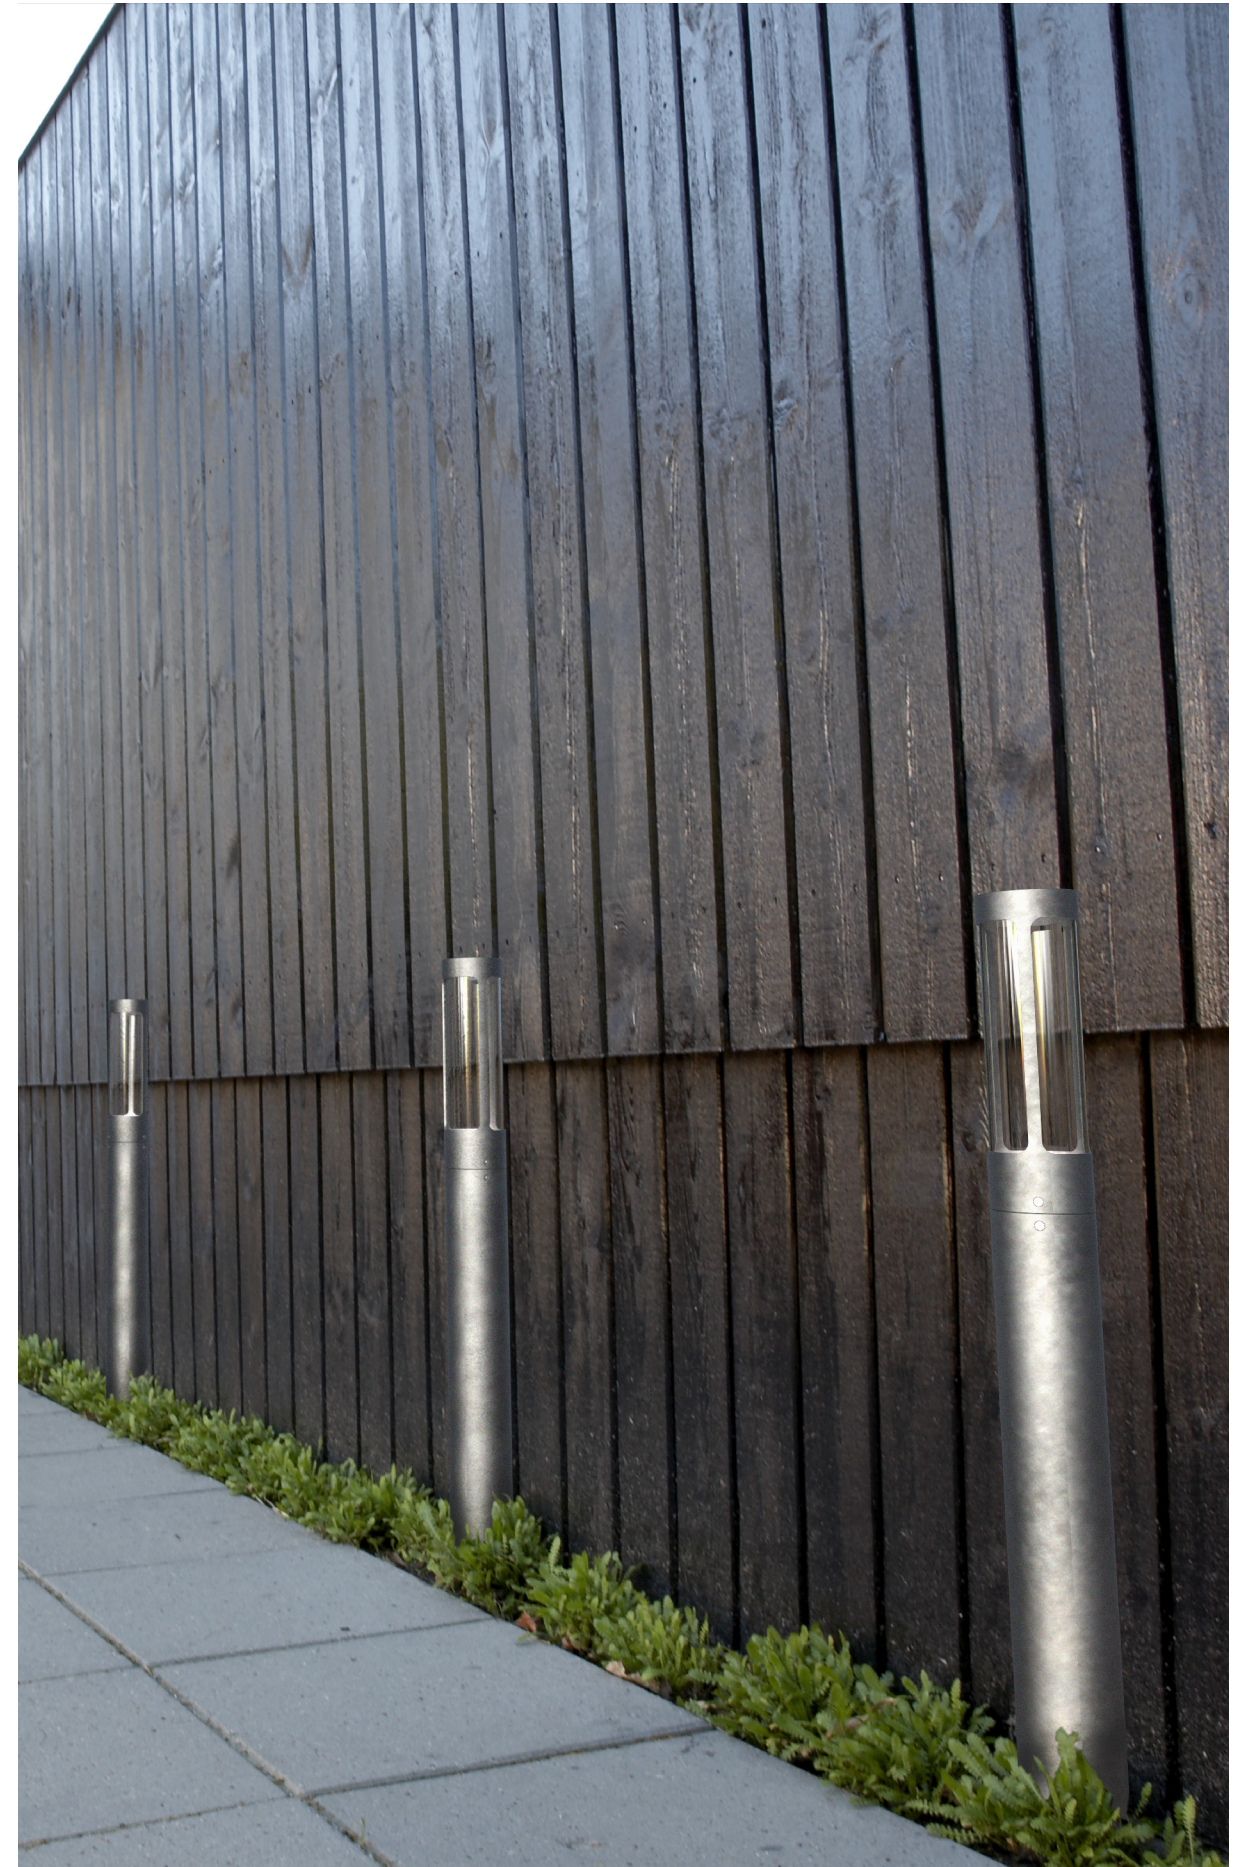

Helix series

HELIX illuminates outdoor areas with its distinctive design. The screws are visible, and the finish exudes raw confidence. The actual light bulb is hidden from the eye. It comes from below and ensures indirect lighting, which is evenly distributed in the top part of the light.

Danish design by Bønnelycke mdd

Get more information about the Helix series on p. 396

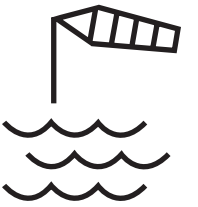

Fuse series

Fuse is the designer's tribute to the North Sea, with the light's raw look and clean lines. The garden light fixture with mounting spike can be placed and moved quickly and easily. In addition, you can purchase a base plate to transform the light fixture into a floor light to be used on the terrace, for instance.

Danish design by Bønnelycke mdd

**DESIGNED FOR
SEASIDE USE**

Get more information about the Fuse series on p. 398

Front series

FRONT is designed for the classical mansion as well as the modern home. The fixture is manufactured in cast aluminium, which supports the simple and clear design idiom. This means that FRONT blends naturally into the architecture of the home. It also means that FRONT fulfils the requirements of being a light source, and an atmospheric element, with the utmost ease. An up-to-date solution with energy-efficient LED technology.

Danish design by HolmbäckNordentoft & Sebastian Holmbäck

Galvanization - designed for seaside use

Galvanizing is a chemical process, where acid cleaned steel is dipped into 460°C melted zinc. When the steel is dipped into the melted zinc, a chemical reaction between the metals occur, where the zinc in a way rusts and form a surface alloy that protects the steel against outside elements that normally would cause rust. This process makes Nordlux's galvanized products durable and a natural product as it is created of natural materials and metals.

Galvanized
Brass
Copper
Corten

Nature is beautiful - but it can also be rough. Crashing waves, wind, salt and especially sand can be a challenge for your home and your outdoor lighting. For Danish Nordlux, this beautiful but harsh nature and weather is part of everyday life.

We therefore strive to produce lamps created from natural materials which are also resistant and durable, year after year, in relentless weather and nature. Brass, copper, nickel and anel corten come together to create a beautiful symphony of products which can withstand the harsh weather and simultaneously age gracefully over time, without deteriorating.

You will also find galvanized steel in the series of resilient materials, which is a speciality of Nordlux's. Therefore, our range of outdoor lamps is broadest in this area. We appreciate the material's great potential, which allows us to offer better and more durable lamps to as many people as possible - in coastal areas and in cities.

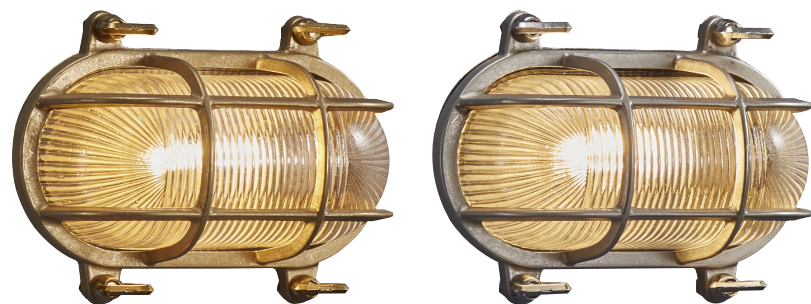

Galvanized steel is one of the preferred materials for outdoor products at Nordlux. This is particularly due to the beautiful appearance the product takes on, but also due to it being one of the most robust materials we can use.

The quality of the galvanizing is a great priority at Nordlux and therefore, it is worth knowing what it means, when a lamp is galvanized.

At Nordlux we recommend galvanized lamps for most outdoor environments. Due to the chemical process, all our galvanized lamps are durable and resistant towards the elements, which means that galvanized lamps are advantageous near the shore. When you purchase a galvanized lamp, it will have a glossy surface. The surface will over time take on a beautifully flat and rustic appearance, as the natural and living material moves and changes continuously.

A galvanized lamp generally does not require any maintenance. Yet, it is recommended ordlux, especially in areas near the coast, to frequently wash the lamp with warm water and a soft brush, to remove salt and in that way achieve the longest possible lifetime.

As the lamp is manually dipped in the melted zinc, there can be variations in the surface in the shape of an uneven surface or minor formations of drops that will be evened out after a few years of exposure. In addition, the galvanizing process can also leave thin 'zinc curtains' hanging from the edge of the shade.

15 year anti corrosion guarantee

Nordlux is one of Scandinavia's leading suppliers of lighting. We design and manufacture lighting with great knowledge of, and consideration for, how light affects us humans and our wellbeing. It is an essential part of our product development. With manufacturing and product development also comes responsibility – a responsibility to protect the resources we have available, and the people we work with.

At the immediate level, this mainly concerns investing in continuous improvement, including via our product development. By focusing on low prices, we commit ourselves to looking at new, simple solutions and processes that use less material, as well as long-life technology. Basically, this means that we take into account many more elements than just that a design should be nice to look at. We assess whether a design can be made more appropriate and less costly through small adjustments. For example, it makes sense for the installation of our lamps to be as simple as possible, ensuring that no additional resources are required for installation. That is why we have more than 60 dedicated engineers, each with more than 10 years of experience in lighting technology, in our development department, all constantly working with this focus.

We are at the forefront when it comes to the development of energy-saving LED technology. You no longer need to compromise between the desire for a warm, pleasant light, innovative design, and the desire to keep power consumption down. Development in this area moves quickly, and new solutions and processes are constantly emerging, making it possible to combine aesthetics with greener technology.

We see sustainability as a task involving everyone associated with Nordlux – from the owners, board and management to employees and suppliers.

In a gentle way we can shake the world

LUMEN

(lm) is the measurement unit for luminous flux. Luminous flux is the total amount of light that the light source submits.

KELVIN

(K) is the colour temperature of the light source- the higher number the colder light.
3000 K = warm white
4000 K = neutral white
6500 K = daylight white

RA

is the colour rendering that the light source provides.

CANDELA

(cd) is the measurement amount for brightness per angle that is submitted from a light source.

GB - The LED technology is constantly undergoing major development which contributes to continuous arrival of new and better LED bulbs on the market. Nordlux always strives to deliver the latest LED technology to our customers, which is why when purchasing lighting or bulbs, the new bulbs can seem different, with improved colour/light output/design.
*For additional bulb info please go to www.nordlux.com.

DK - LED er til stadighed under en betydelig udviklingsproces, som bevirker, at der med stor hyppighed kommer nye og bedre LED pærer på markedet. Nordlux bestræber sig på altid at levere den nyeste LED teknik til vores kunder, hvorfor man ved genkøb af lamper og ved tilkøb af pærer kan opleve, at de nye pærer har anderledes og forbedret farve/lysudbytte/udformning.
*For supplerende pæreoplysninger gå venligst til www.nordlux.com

SE - LED är fortfarande under en betydande utvecklingsprocess, som bidrar till att det i snabb takt kommer nya och bättre LED lampor på marknaden. Nordlux strävar efter att leverera den senaste LED-tekniken till sina kunder, därför kan man vid återköp eller vid köp av nya lampor uppleva att de nya lamporna har en annorlunda och förbättrad färg/ljusflöde/utformning.
*För ytterligare information angående ljuskälla vänligen gå till www.nordlux.com

FR - LED est constamment en développement important, ce qui a pour effet d'amener très fréquemment de nouvelles ampoules LED améliorées sur le marché. Nordlux s'efforce de toujours fournir la dernière technologie LED à nos clients ; c'est pourquoi, lorsque vous rachetez des lampes et acquérez des ampoules, vous pouvez trouver que les nouvelles ampoules ont une couleur/une sortie de lumière/un design différents et améliorés.
*Pour plus d'informations concernant l'ampoule merci de visiter www.nordlux.com.

DE - LED unterliegt ständig einem bedeutenden Entwicklungsprozess, durch den mit großer Geschwindigkeit neue und bessere LED-Lampen auf den Markt kommen. Nordlux ist bestrebt, Ihren Kunden immer die neueste LED-Technik anzubieten, wodurch man beim Neukauf von Leuchten und Nachkauf von Leuchtmitteln erleben kann, dass die neuen Leuchtmittel eine andere und verbesserte Farbe, Lichtausbeute und Form haben.
*Für weitere Informationen gehen Sie bitte zu Leuchtmittel www.nordlux.com.

VEDLIGEHOELDELSE

MAINTENANCE

PFLEGE

UNDERHÅLL

ENTRETIEN

Galvaniseret stål | Meget vejrbestandig. Kan bruges i alle miljøer. Vedligeholdelse: Almindelig aftørring. Nordlux giver 15 års garanti på alle udendørslamper i galvaniseret stål. Denne garanti gælder rustangreb med gennemtæring og er gældende mod fremvisning af købskvittering. Der ydes ingen garanti på dele som er beskadiget ved slidtage eller på fejlbehandling af lamperne.

Kobber | Meget vejrbestandig. Kan bruges i alle miljøer. Vedligeholdelse: Almindelig aftørring. Nordlux giver 15 års garanti på alle udendørslamper i kobber. Denne garanti gælder rustangreb med gennemtæring og er gældende mod fremvisning af købskvittering. Der ydes ingen garanti på dele som er beskadiget ved slidtage eller på fejlbehandling af lamperne.

Plast | Meget vejrbestandig. Kan bruges i alle miljøer. Vedligeholdelse: Almindelig aftørring.

Rustfrit stål | Velegnet til udendørs brug, når undtages aggressive miljøer. Vedligeholdelse: Behandles med syrefri olie inden opsætning med efterfølgende aftørring med blød klud. Denne behandling gentages 3-4 gange om året.

Aluminium | Aluminiumsprodukterne kan opdeles i følgende: Ekstruderet og anodiseret aluminium er meget vejrbestandig og kan bruges i alle miljøer. Vedligeholdelse: Almindelig aftørring. Støbt aluminium i øvrigt er velegnet til udendørs brug, når undtages aggressive miljøer. Vedligeholdelse: Behandles med syrefri olie inden opsætning med efterfølgende aftørring med blød klud. Denne behandling gentages 3-4 gange om året.

Corten | Corten stål er en ståltype der er konstrueret med et indhold af kobber, fosfor, nikkel og chrom i et forhold der gør stålet rusttrægt på en måde, hvor den "færdige" rustne overflade beskytter stålet mod tæring 6-8 gange bedre end ved "normalt" rustent stål. Vær opmærksom på eventuel rustafsmitning i hærdeperioden. Hvis stålet nedgraves vil korrosionshastigheden være den samme som for almindeligt stål. Ordet Corten stål kommer af eng. "CORrosion resistant high TENSile steel".

Galvanized steel | Very resistant to weather. Can be placed in any environment. Maintenance: wipe off at regular intervals. Nordlux offers up to 15 year anti-corrosion warranty on lights in galvanized steel. This guarantee applies to extensive corrosion in the form of holes in the metal caused by rust. The guarantee is subject to presentation of receipt. There is no guarantee on components which have been affected by wear and tear or mistreatment of the lights.

Copper | Very resistant to weather. Can be placed in any environment. Maintenance: wipe off at regular intervals. Nordlux offers up to 15 year warranty on lights in copper. This guarantee applies to extensive corrosion in the form of holes in the metal caused by rust. The guarantee is subject to presentation of receipt. There is no guarantee on components which have been affected by wear and tear or mistreatment of the lights.

Plastic | Very resistant to weather. Can be placed in any environment. Maintenance: wipe off at regular intervals.

Stainless steel | Suitable for outdoor use, except for aggressive environments. Must be treated with acid-free oil prior to mounting. After mounting wipe off the fitting with a dry and soft cloth. This treatment should be repeated 3-4 times a year.

Aluminium | The aluminium products can be divided into two groups: Extruded and anodized aluminium is very resistant to weather and can be placed in any environment. Maintenance: wipe off at regular intervals. Cast aluminium is suitable for outdoor use, except for aggressive environments. Maintenance: must be treated with acid-free oil prior to mounting. After mounting wipe-off the fitting with a dry and soft cloth. This treatment should be repeated 3-4 times a year.

Corten | Corten steel is a type of steel which contains copper, phosphorus, nickel and chrome in a ratio that makes the steel weathering steel so that the "ready" rusty surface protects the steel against corrosion 6-8 times better than the "standard" rusty steel. Be aware of any rust staining in the curing period. If the steel is buried, its corrosion rate will be the same as for standard steel. The word "Corten" from "Corten steel" originates from "CORrosion resistant high TENSile steel".

Verzinkte Leuchten | Sehr wetterbeständig. Überall einsetzbar. Pflege: Normales Reinigen. Nordlux leistet bis zu 15 Jahre Garantie für alle Aussenleuchten in feuerverzinkter Ausführung. Diese Garantie gilt für Rostbildung in Form von Angriff der Metal und gilt nur gegen Quittungsleistung. Nordlux leistet keine Garantie für Ersatzteile, die beschädigt sind durch Abnutzung oder Fehlbehandlung der Leuchten.

Kupfer | Sehr wetterbeständig. Überall einsetzbar. Pflege: Normales Reinigen. Nordlux leistet bis zu 15 Jahre Garantie für alle Aussenleuchten in kupfer. Diese Garantie gilt für Rostbildung in Form von Angriff der Metal und gilt nur gegen Quittungsleistung. Nordlux leistet keine Garantie für Ersatzteile, die beschädigt sind durch Abnutzung oder Fehlbehandlung der Leuchten.

Kunststoff | Sehr wetterbeständig. Überall einsetzbar. Pflege: Normales Reinigen.

Edelstahl | Geeignet für den Außenbereich – jedoch nicht in aggressiver Umgebung. Pflege: Vor Montage muss die Leuchte mit säurefreiem Öl behandelt und mit einem weichen Tuch getrocknet werden. Dieses sollte 3-4 Mal im Jahr wiederholt werden.

Aluminium | Aluminiumleuchten unterscheiden sich wie folgt: Extrudiertes und eloxiertes Aluminium ist sehr wetterbeständig und ist überall einsetzbar. Pflege: Normales Reinigen. Gegossenes Aluminium ist ebenfalls für den Außenbereich geeignet – jedoch nicht in aggressiver Umgebung. Pflege: Vor Montage muss die Leuchte mit säurefreiem Öl behandelt und mit einem weichen Tuch getrocknet werden. Dieses sollte 3-4 Mal im Jahr wiederholt werden.

Corten | Corten Stahl ist ein Stahltyp, der mit Anteilen an Kupfer, Phosphor, Nickel und Chrom in einem Verhältnis hergestellt wird, das den Stahl auf eine Weise rostträge macht, durch die die „fertige“ rostige Oberfläche den Stahl 6 bis 8 mal so gut vor Korrosion schützt als bei normalem rostigen Stahl. Bitte beachten Sie, dass es im Härtnungsprozess zu Rostabfärbungen kommen kann. Wenn der Stahl vergraben wird, ist die Korrosionsgeschwindigkeit genau so wie bei normalem Stahl. Das Wort Cortenstahl ist aus dem englischen „CORrosion resistant high TENSile steel“ abgeleitet.

Galvaniserat stål | Mycket väderbeständigt. Kan användas i alla miljöer. Underhåll: Normal avtorkning. Nordlux ger 15 års garanti på alla utomhuslampor i galvaniserat stål. Denna garanti gäller rostangrepp som har genomträngt och gäller mot uppvisande av inköpskvitto. Det lämnas ingen garanti på delar som har skadats vid slitage eller av felbehandling av lamporna.

Koppar | Mycket väderbeständigt. Kan användas i alla miljöer. Underhåll: Normal avtorkning.

Plast | Mycket väderbeständigt. Kan användas i alla miljöer. Underhåll: Normal avtorkning.

Rostfritt stål | Lämpligt för utomhusbruk, utom i aggressiva miljöer. Underhåll: Behandlas med syrafri olja och torkas av med en mjuk trasa före uppsättning. Behandlingen upprepas 3-4 gånger om året.

Aluminium | Aluminiumprodukterna kan delas upp i följande typer: Extruderad och anodiserad aluminium är mycket väderbeständig och kan användas i alla miljöer. Underhåll: Normal avtorkning. Övrig gjuten aluminium är lämplig för utomhusbruk, utom i aggressiva miljöer. Underhåll: Behandlas med syrafri olja och torkas av med en mjuk trasa före uppsättning. Behandlingen upprepas 3-4 gånger om året.

Corten | Cortenstål är en ståltyp som är framställd med ett innehåll av koppar, fosfor, nickel och krom i ett förhållande som gör att stålet rostar långsamt och på ett sätt där den "färdigrostade" ytan skyddar stålet mot mod frätning 6-8 gånger bättre än "vanligt" rostigt stål. Var uppmärksam på eventuell rostavfärgning under härdningsperioden. Om stålet grävs ner kommer korrosionshastigheten att vara densamma som för vanligt stål. Ordet Cortenstål kommer av engelskans "CORrosion resistant high TENSile steel".

Acier galvanisé | Très résistant aux intempéries. Peut être utilisé dans tous les environnements. Entretien: séchage général. Les lampes Nordlux en galvanisation bénéficient d'une garantie de 15 ANS à compter de la date d'achat sur le bon d'achat. Le garantie couvre formation de rouille (la surface est entamée) et n'est que si la date d'achat figure sur le bon d'achat. La garantie ne couvre pas le composants, endommagés par l'usure normale ou un emploi abusif.

Cuivre | Très résistant aux intempéries. Peut être utilisé dans tous les environnements. Entretien: séchage général. Les lampes Nordlux en cuivre d'une garantie de 15 ANS à compter de la date d'achat sur le bon d'achat. Le garantie couvre formation de rouille (la surface est entamée) et n'est que si la date d'achat figure sur le bon d'achat. La garantie ne couvre pas le composants, endommagés par l'usure normale ou un emploi abusif.

Matière plastique | Très résistant aux intempéries. Peut être utilisé dans tous les environnements. Entretien: séchage général.

Acier inoxydable | Convient parfaitement pour l'utilisation en plein air, mais à l'abri des environnements agressifs. Entretien: à traiter avec de l'huile exempte d'acides avant l'installation, puis séchage avec un chiffon doux. Ce traitement est répété 3 à 4 fois par an.

Aluminium | Les produits en aluminium peuvent être subdivisés comme suit: L'aluminium extrudé et anodisé est très résistant aux intempéries et peut être utilisé dans tous les environnements. Entretien: séchage général. La fonte d'aluminium convient également pour une utilisation en plein air, mais à l'abri des environnements agressifs. Entretien: à traiter avec de l'huile exempte d'acides avant l'installation, puis séchage avec un chiffon doux. Ce traitement est répété 3 à 4 fois par an.

Corten | L'acier Corten est un acier conçu avec une teneur en cuivre, phosphore, nickel et chrome, dans une proportion qui rend l'acier résistant à la corrosion, d'une façon où le surface « finie » rouillée protège l'acier contre la corrosion 6 à 8 fois mieux que l'acier rouillé « normal ». Merci de faire attention aux tâches rouillées dans la période du trempé! Si l'acier est enfoui, le taux de corrosion doit être le même que pour l'acier ordinaire. Le mot « acier Corten » vient de l'anglais « CORrosion resistant high TENSile steel » (acier résistant à la corrosion à haute résistance).
